DANGEROUS FISH.

Ways of the Green Meray of Bermuda and the Devillish.

When one speaks of dangerous fish the first that come to mind are the shark and the ectopus. But neither of these is really formidable to fishermet. The shark never attacks a boat and the octopin very rarely.

A much worse creature than either aback or octopus is the devilian-a large ray that is common in the warm waters of the Atlantic. This fish grows to a weight of a ton and a half and, belides formidable teeth, is armed with a horrible burbed and poisoned. spike in the tail. It has often been known to attack boats.

A fishing party in a launch succeed. ed in harpooning one of these not in the buy known as Arnusas Pass, Texas. The brute towed them eighteen miles out to sea and very nearly upont the launch. It was twenty five feet long and weighed 3,000 pounds.

A very pasty customer is the green moray of Bermuda. This rather resembles a conger rel, but is green in color and savage beyond any fish that. swims. An English marine officer, tishing off Bermuda a year or two ago, Imoked a large specimen and began to pull It in.

His negro boatman, his eyes staring with fright, begged him wildly to cut the line. The officer at first refused, and with a crunch of saw edged teeth bite a large piece out of its own body hoaf.

The swordfish is a dangerous creature. Swordfish are caught for the rake of their oil and flesh, especially along the Atlantic coast of the United States. They are hurpooned in the same manner in which whales used to be killed. Quiet enough until attack-ed, the sword6sh then seems to go als, Dr. E. W. Hall, 2926 Olive street, raving mad and fights with unmatched St. Louis. ferocity.-London Answers.

> > The Crack in the Plate.

There was company to dinner at Nellie's home in South Broad street, and the diners were enjoying the first course, which consisted of oyster soup. Nellie made away with hera for some time in silence until she had nearly cleaned the plate, when she suddenly paused and, looking at her mother across the table, said in a stage whis

"Mamma, what you fink? Dere's a hair in the soup!"

"Hush, Nellie," said mamma, frowning. "It's naihing but a crack in the plate."

Nellie moved the bowl of her spoon back and forth over the supposed crack and then exclaimed triumphantly: "Kin a crack move?"-St. Louis Re-

OBSERVANCE OF EASTER.

Discrepancy In Computing the Data Not Corrected Until 1762.

The observance of Easter dates back to about the year 68, at wideh time there was much contention among the eastern and western churches as to what day the Testival should be observed. It was flasily ordained at the council of Nice in the year 325 that it must be observed throughout the Christian world on the same day. This decision settled that Easter Should be kept upon the Sunday first after the foorteenth day of the Brst Jewish month, but no general copelusion was arrived at as to the cycle by which the festival was to be regulated, and some churches adopted one rule and some another. This diversity of usage was put an end to, and the Roman rule making Ensier the first Sunday after the fourteenth day of the caten day moon was established in England. in 669. After pile conturies a diserepancy in the keeping of Easter was caused by the authorities or the fine Hali church declining to adopt the reformation of the Gregorian encendar to 1582. The difference was settled in 1752 by the adoption of the rule which makes Easter day always the first Sunday after the full moon which appears on or next after the twenty-first day of March. If the full moon happens upon a Sunday, Easter is the Sunday after.
